3. ELECTRONIC SIGNATURE

1 To use the T-Pro USB cryptographic device:

- Download and install the software (local administrator's rights are required for the installation) http://www.bnpparibas.pl/files/klienci-biznesowi/bankowosc-internetowa/comarch_crypto_provider.exe
- alternatively, download and unzip (bnp.dll library) – if the system does not download it automatically <http://www.bnpparibas.pl/files/klienci-biznesowi/bankowosc-internetowa/bnp.zip>

2 Place the bnp.dll library in the Comarch Crypto Provider installation location in the DLLS directory – by default, this is the C:\Program Files\Comarch\ComarchCryptoProvider\dlls.

3 Open a web browser and go to

4 Enter your **login** and click **Next**.

5 Enter the **start password** that we sent to you via SMS or in a secure envelope and click **Log in**.

6 To generate a new key, click the Generate a **key button**.

Log in to GOonline Biznes

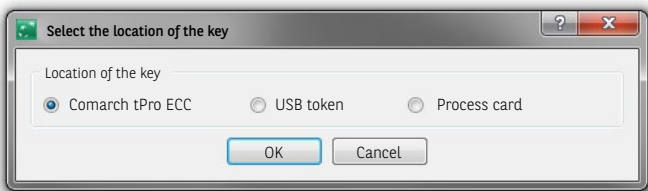

Generating a key for the login
jankowski123

To log in to the system, generate a key.

GENERATE KEY

[Problems logging in?](#)

7 When generating the key, select the **Comarch tPro ECC** location.

8 Define the PIN and PUK codes for your device and click **OK**.

USB Card/Media initialisation

A PIN is a code consisting of 4 to 8 characters, which secures the keys stored on the cryptographic device. The PIN code makes it impossible for unauthorised and unintended people to use your cryptographic card or USB media, and therefore from giving instructions on your account that require an electronic signature. The PIN code is completely confidential and should be known only to you.

The PUK (or Personal Unblocking Key) is a code consisting of 8 to 16 characters which can be used to unblock a cryptographic device if it is blocked after entering the wrong PIN code 5 consecutive times. The PUK code should be stored in a safe place and protected against loss.

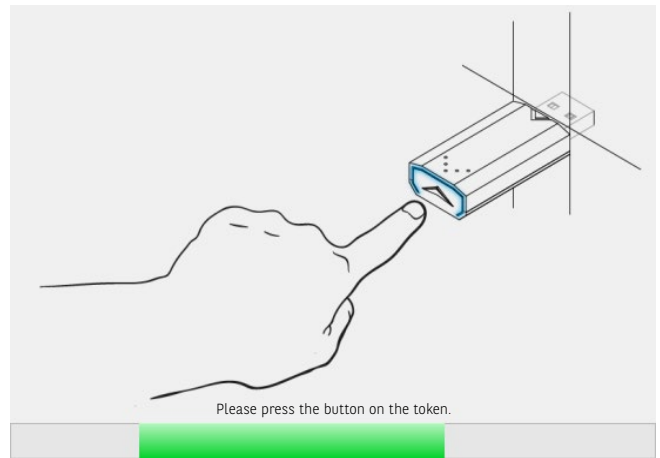

Please note that you should not keep your PIN number or PUK unblocking code together with your cryptographic device. This may enable unauthorised people to access your account if your card or USB device is lost or stolen.

Enter a new PIN:
[input field] [icon]
Re-enter the new PIN:
[input field] [icon]

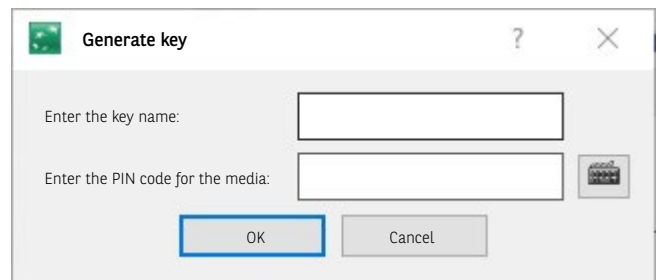

PUK
Enter a new PUK:
[input field] [icon]
Re-enter the new PUK:
[input field] [icon]

OK **Cancel**

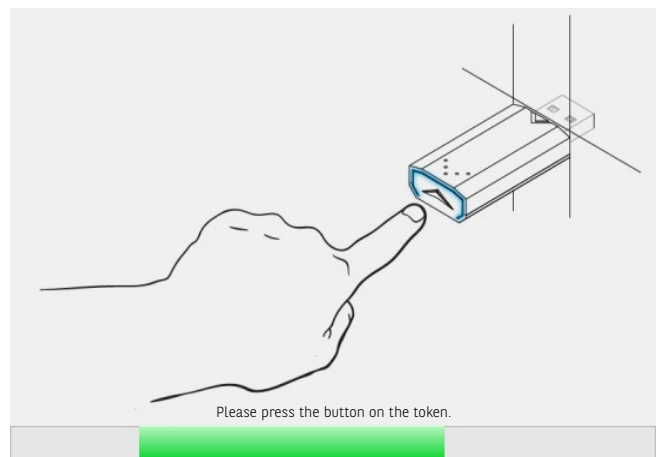

9 Press the button on the device.

10 Enter **a name for the key** (it can be anything you like), enter the PIN code you have just set for the media and click **Generate**.

11 Press the button on the device again.

12 Congratulations, you have just logged in to **GOonline Biznes!**

4. MASKED PASSWORD AND MOBILE AUTHORIZATION

1 Search and download the GOMobile Biznes app from the App Store or Google Play shop.

Activation of GOonline Biznes system
To get full access to the GOonline Biznes system, please activate the GOmobile Biznes application and enable the mobile token.
[User manual](#)

Add new device

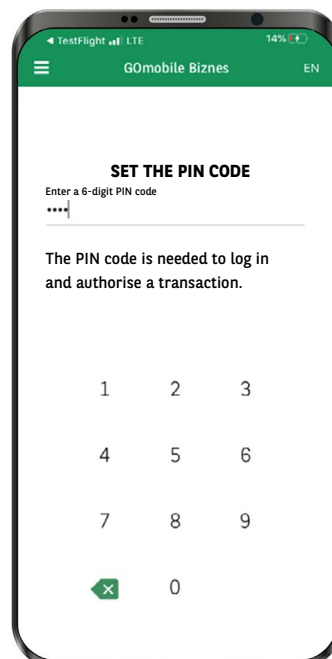

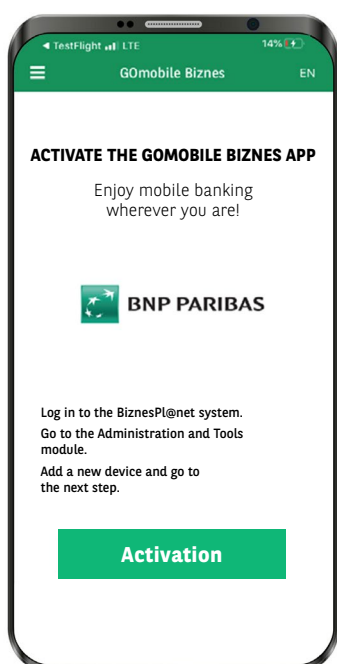

12 Enter **the device name** and click **Next**.

13 Confirm the instruction with **a one-time SMS code** and click **Activate**.

14 Launch the **GOmobile** app.

16 Scan the **QR code** that appears in the GOonline Biznes system. You can also enter the code manually using the **Enter code manually** function.

17 Set the **PIN code** needed to log in and authorise transactions.

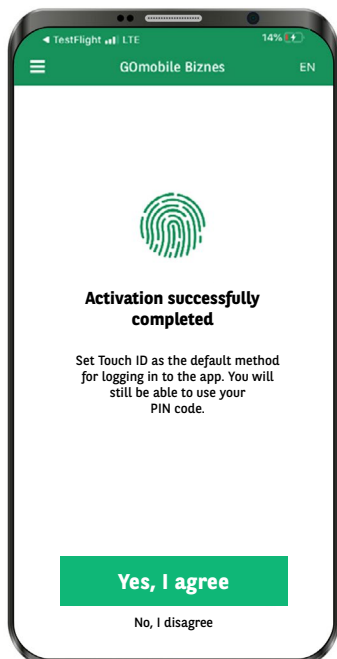

15 Enter a **one-time SMS code** to take photos and record videos.

18

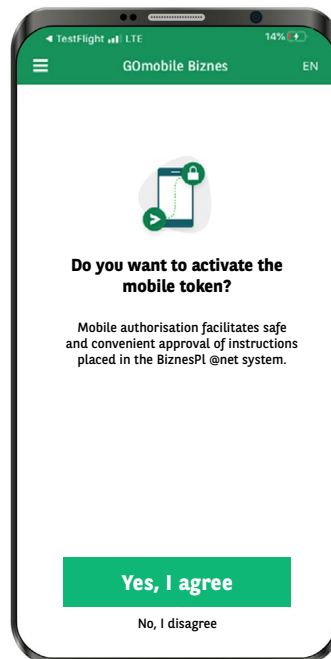

If you wish, you can also enable biometrics:

- using Touch ID/Face ID for iOS devices
- using your fingerprint for Android devices

19

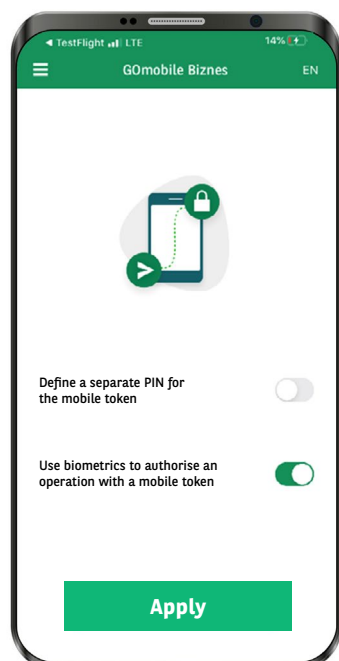

Click **Yes, I agree** to proceed with the mobile token activation.

20

The PIN number previously defined for logging into the **GOmobile Biznes** application is used for mobile authorisation by default. The application also allows for the definition of a separate PIN number for mobile authorisation – for this purpose, the relevant option must be activated and the PIN number must be defined.

The use of biometrics for the mobile authentication is enabled by default.

**21**

After pressing the **Apply** button, the mobile token will be activated and you will be logged in to the **GOmobile Biznes** application.

22

Log out of the **GOonline Biznes** system. Mobile authorisation will be activated the next time you log in to the **GOonline Biznes** system.
