Quarterly financial results

Net profit growth – higher levels of all major NBI categories supported by lower costs. Normalization of cost of risk and moderate increase in the impact of legal risk of the CHF portfolio

> Net banking income [PLN million]

> Operating expenses [PLN million]

> Cost of risk and impact of CHF portfolio legal risk [PLN million]

> Net result [PLN million]

Noticeably higher quarterly net banking income (also w/o credit holidays impact) thanks to growth in net interest income, net F&C and net trading income.

Lower general administrative costs, continued growth in personnel expenses.

Normalization of cost of risk primarily due to the lack of positive impact of macroeconomic parameter verification.

Moderate increase in the impact of the legal risk of the CHF mortgage portfolio. Recorded level close to the quarterly average after excluding 4Q 23 and 1Q 24.

Reported quarterly net profit +2% q/q and +43% y/y.

Key financial ratios

High return on equity. Further optimization of the net interest margin, improvement in core revenues.
Good quality of the loan portfolio translating into low cost of credit risk

Cost / Income [%]

Cost of credit risk [%]

Net interest margin on assets [%]

ROE [%]

Improvement in the reported Cost / Income ratio due to the verification of the credit holidays impact, NBI improvement and decrease in costs.
Cost / Income w/o BGF costs and credit holidays at the level comparable to 12M 2023.

Increase of the net interest margin (w/o credit holidays impact) due to further optimization of the cost of financing, improvement of the result on derivatives and management of surplus liquidity.

Low cost of credit risk despite the lack of positive one-off events comparable to 2Q 24. Very good quality of the loan portfolio.

Reported ROE at the level of 18.2%.

Macroeconomic
environment

#BANKDOBRYCHDECYZJI

GDP, economic situation and inflation

Growth slowing down again, as higher inflation hits the consumer

> The economy slowed in Q3, but leading indicators remain consistent with growth recovery ahead

European Commission: Business sentiment indices for Poland in Q3 2024

> Higher inflation driven by the energy price hike in July

Contribution of main components to CPI inflation (pp)

Available data suggest a renewed softening of economic growth in Q3 2024 to less than 3% y/y from 3.2% y/y in Q2 2024.

While the weakness in industry and construction might have been expected, the poor retail sales numbers in recent months may come as a surprise. Perhaps, despite real incomes still growing pretty rapidly, the increase in inflation resulting from higher energy prices in July this year might have dented the consumers' sentiment.

Despite weak current activity, in most large sectors leading indicators are at higher levels than a year ago. This is consistent with expected economic recovery in the following months.

The increase in energy prices caused CPI inflation to accelerate to almost 5% in September. Price pressures will remain at an elevated level for the next several months. In the second half of 2025, when base effects expire, headline inflation is seen decreasing again towards the NBP target.

Monetary policy, exchange rate and the banking sector

Although interest rates remain on hold, demand for credit is rising again

> Interest rates unchanged from October 2023; PLN supported by positive real interest rate

Since October 2023, Poland's Monetary Policy Council has kept interest rates unchanged. Yet, the recent statements of Council members, including the Governor of the National Bank of Poland, suggest a resumption of the monetary policy easing cycle at the beginning of next year.

Despite rising inflation in the third quarter of 2024, the real interest rate in Poland remains positive, supporting a strong zloty exchange rate - despite deteriorating trade and current account balances as of late.

In the last couple of months, demand for credit in all segments, including non-financial enterprises has been growing (both for working capital and investment loans).

Expectations of stronger growth next year - especially in industry - and lower interest rates should support further acceleration in lending to households and companies over the coming quarters.

> Banking sector: Credit demand picking up in all segments

* Discretionary Portfolio Management

Increase y/y in the value of investment funds and Customers' assets on brokerage accounts

- In Q3 2024, there was a further increase in the value of funds invested in investment funds of the BNP Paribas Group (+69.7% y/y, +10.7% q/q).
- Customers' interest in subfunds investing in the market of short-term debt instruments is maintained.
- Increase y/y in the value of Customers' assets on brokerage accounts (+17.6%) and a slight decrease q/q (-2.6%).

Structure of BNP Paribas TFI investment products [%]

Net interest income

Increase in adjusted net interest margin. Positive adjustment of the impact of credit holidays. Further improvement in the result on derivatives, securities portfolio and optimization of the cost of deposits

> Net interest income [PLN million]

- In Q2 negative impact of credit holidays of PLN -203 million, in Q3 revision of estimate and positive impact of PLN +100 million.
- Increase in net interest income from securities and reverse repo transactions y/y (PLN +460 million) and q/q slight decrease (PLN -5 million).
- Improved net interest income from derivative instruments as part of hedge accounting (lower negative impact) PLN +294 million y/y, PLN +25 million q/q.
- Decrease in net interest income on loans y/y as a result of lower average interest rates, partially neutralized by lower interest costs on Customer deposits. Continued comfortable liquidity situation enabled the further optimization of the cost of deposits in Q3.

* w/o impact of credit holidays

> Net interest income and expenses [PLN million]

> Net interest margin, quarterly* [%]

Net fee and commission income

Increase in the net fee and commission income in Q3 2024 - higher revenues from M&A advisory services, cards and loans

share in NBI

Net fee and commission income [PLN million]

Fee and commission income and expenses [PLN million]

- Higher y/y net fee and commission income due to increase in asset management and brokerage operations F&C, from banking card area as well as other fees despite lower income from credit activity and insurance.
- Increase in quarterly F&C mainly thanks to the higher results:
 - in the card area (due to sales support from Mastercard and cooperation with Euronet; increase in the number of card transactions),
 - from credit and guarantee activities and other fees (M&A advisory services as well as large transactions in the CIB area).

Net trading and investment income

Increase in net trading income. Positive impact of transactions in the CIB area as well as improvement in stock and share valuations

share in NBI

Net trading income [PLN million]

-15.4% y/y

+12.2% q/q

- Decrease in the net trading income y/y among others due to the lower margin on currency and derivative transactions with Customers (-PLN 104.4 million y/y related to the lack of one-off events comparable to 2023). The result on valuation of IRS hedging the credit portfolio valued at FV and the result on equity instruments valued at fair value were lower on a y/y basis also (-PLN 12.9 million and -PLN 3.1 million respectively).
- Growth in quarterly terms due to improved results from transactions on financial instruments in CIB as well as improved valuation of shares of infrastructure companies (VISA, Mastercard, BIK, KIR) despite a slightly lower margin on currency and derivative transactions with Clients.

Margin on FX and derivative transactions with Customers [PLN million]

included in net trading income

-16.5% y/y

-5.9% q/q

Net investment income [PLN million]

- Change of net investment income y/y and q/q as a result of fluctuations in the valuation of the loan portfolio measured at FV (PLN -4.6 million in Q3 24, PLN +3.3 million in Q2 24, PLN +3.8 million in Q1 24, PLN +1.0 million in Q3 23, PLN +2.8 million in Q2 23 and PLN -12.4 million in Q1 23).

Operating expenses, depreciation and amortization

Costs down q/q despite slight increase in personnel expenses

Operating expenses [PLN million]

- Increase in costs y/y mainly due to higher personnel expenses (an increase in wages partially neutralized by a decrease in employment by 309 FTEs y/y), higher depreciation costs (related to transformation, digitalization and acceleration of depreciation of some systems), higher costs of external services under other contracts and consulting, IT, marketing and BGF.
- The quarterly cost decrease was primarily due to lower other administrative costs by PLN 17.9 million, -6.4% (lower costs of external services under other contracts and consulting) as well as the lack of regulatory costs (vs. PLN 8.3 million in Q2 2024) despite a slight increase in personnel expenses.

* Cost of risk expressed as the ratio of the net allowances on expected credit losses on financial assets and contingent liabilities to the average balance of gross loans and advances to customers valued at amortised cost (calculated based on quarter-end balances).

In Q3 2024, the cost of risk result amounted to PLN -99 million. The level of the cost of risk was significantly impacted by:

- additional of PLN 43 million of provisions as a result of the update of the macroeconomic forecasts (forward looking), including PLN 35 million for the Institutional Customer portfolio,
- Additional provision in the form of a Post Model Adjustment in the amount of PLN 30 million for the future materialization of risk resulting from negative weather phenomena affecting agricultural crops (e.g. drought, hailstorms),
- release of PLN 33 million of provisions, among others as a result of update of parameters used in the calculation of portfolio provisions and update of the impact of legal risk for the portfolio secured by mortgage in CHF.

In 9M 2024, the net allowances amounted to PLN -187 million. The lower cost of risk in 9M 2023 was primarily due to significant recoveries from the institutional clients NPL portfolio and the release of previously created provisions for future risk materialization.

Capital adequacy

Safe capital position

TCR and Tier 1 above the minimum regulatory requirement as at the end of Q3 2024: +5.1 pp and +3.5 pp, respectively

Increase in the risk exposure amount due to the credit risk.

Slight decrease in Tier 2 capital due to the repayment of two highly amortized subordinated loans.

Specific regulatory requirements for the Bank at the end of Q3 2024:

- no capital requirement for FX loans,
- OSII buffer at 0.25% (positive Financial Stability Committee opinion regarding the increase of the buffer to the level of 0.5%),
- P2G capital add-on at 0.67 pp (consolidated) and 0.70 pp (standalone) (requirement down by 0.10 pp in Q4 2023).

MREL-TREA ratio as of the end of Q3 2024 (21.64%) above the minimum MREL requirement (18.78% including the combined buffer requirement).

On 24 October 2024, the Supervisory Board adopted a resolution approving the issuance of capital bonds with a value not exceeding EUR 150 million. The issue is planned for Q4 2024. The capital bonds will be qualified to the Bank's own funds as Additional Tier 1 (AT 1) instrument after obtaining the relevant consent from the Polish Financial Supervision Authority.

Loan portfolio

Structure of loans in Individual and Institutional Customer segments

Individual Customer loans [PLN million]

- Further q/q decrease in the PLN mortgage portfolio as a result of still relatively low sales of new loans. Decline in the value of CHF mortgages (-9.7% q/q, -59.3% y/y) primarily due to the impact of the legal risk recognized as a reduction of gross value.
- The share of mortgages in loans to Individual Customers amounts to 61.9% (-0.4 pp q/q, -3.0 pp y/y).
- Increase in the cash loan portfolio +1.0% q/q (+2.8% y/y).

* Inter alia: car loans, instalment loans, overdraft facilities, credit cards

Institutional Customer loans** [PLN million]

- Increase in gross loans to enterprises (+2.1% q/q, +1.9% y/y). Positive dynamics of the leasing portfolio +1.0% q/q (+9.3% y/y).
- Increase in the individual farmers gross portfolio +0.9% q/q (+10.4% y/y). The share of the portfolio in loans to Institutional Customers stood at 15.1% (-0.1 pp q/q, +0.9 pp y/y).
- At the end of Q3 2024, the share of loans to enterprises in loans to Institutional Customers was equal to 73.3% (+0.2 pp q/q, -1.4 pp y/y), the share of leasing amounted to 11.5% (-0.1 pp q/q, +0.6 pp y/y).

** including the portfolio measured at fair value for "Farmers" and "Enterprises" items (breakdown based on MIS data)

Deposit base structure

Term structure of deposits and by Customer segments

Deposit term structure [PLN million]

- Increase in the share of Customers' current accounts in total deposits: 64.1% at the end of Q3 2024 (+1.3 pp q/q, +2.7 pp y/y).
- In Q3 2024, both term and current deposits decreased by PLN 2,724 million (-6.0% q/q) and PLN 334 million (-0.4% q/q), respectively.
- In the case of current deposits, the portfolio of Institutional Customers decreased by PLN 415 million (-0.8% q/q) and current accounts of Individual Customers slightly increased by PLN 81 million (+0.3% q/q).

- Increase in net interest income y/y due to higher income from investing surplus liquidity (from securities and reverse repo transactions), improved income on derivatives as part of hedge accounting and decline in interest costs on Customer deposits. Negative impact of credit holidays in 9M 2024 at PLN -103 million (in 9M 2023, the impact of credit holidays was PLN +33 million). Net interest income w/o credit holidays impact would be higher by 14.1% y/y.
- Higher net fee and commission income as a result of the growth in asset management and brokerage operations, in the banking card area and other fees, partially offset by lower income from credit and insurance activities.
- Lower net trading income as a result of lower result on margin on currency and derivative transactions with Customers and lower result on equity instruments measured at FV.
- Excluding credit holidays impact, net banking income in 9M 2024 would be 7.7% higher than the results in 9M 2023.

- Higher net interest income in Q3 2024 vs Q3 2023 mainly as a result of positive recognition of credit holiday impact in Q3 2024 (PLN +99.6 million against PLN +11 million in Q3 2023). W/o this impact, the result would have been higher by 9.3% due to higher interest income from investing surplus liquidity, improved result on derivatives as part of fair value hedge accounting and lower costs on Customer deposits.
- Growth of net fee and commission income as a result of higher income in all areas of activities except for credit activities.
- Lower net trading income as a result of lower result on derivative transactions with Customers.
- Excluding credit holidays impact, net banking income in Q3 2024 would be 5.6% higher than the result in Q3 2023.
