| Contact to the Product manufacturer | Call +48 22 563 88 60 for more information | | |

You are about to purchase a product that is not simple and may be difficult to understand.

WHAT IS THIS PRODUCT?

► TYPE

An over-the-counter (OTC) derivative instrument which is a financial instrument within the meaning of Article 2 of the Act of 29 July 2005 on trading in financial instruments.

► TERM

The recommended holding period for the Product is one year.

► OBJECTIVES

The purpose of the Product is to manage the risk of adverse FX rate fluctuations. By entering into a Forward Transaction, we shall sell to you the Notional Amount, while you shall buy it for its equivalent in the Settlement Currency, calculated at the Exchange Rate. The Settlement Date falls not earlier than on the third Business Day following the Transaction Conclusion Date. Return on the Product depends, among others, on MtM Dependency Factors (indicated below). The Product continues until the Settlement Date. Early termination

of the Product is only possible in the circumstances set out in the section "How long should I hold it and can I take money out early?".

Product risks

No option to take advantage of the exchange rate decrease below the value of the Exchange Rate on the Settlement Date.

Examples of main features of the Product (Transaction Terms and Conditions)

| | | | |
|-----------------------------|---------------|------------------------|------------|
| Notional Amount | 10 000,00 EUR | Exchange Rate | 4,6693 |
| Transaction Currency | EUR | Settlement Date | 06-11-2025 |
| Settlement Currency | PLN | | |

The Exchange Rate is expressed in the Settlement Currency per one unit of the Transaction Currency

| Underlying Need | Risk to be hedged | MtM Dependency Factors |
|--|---|--|
| Expected future purchase of the Transaction Currency | Possible appreciation of the Transaction Currency | Spot FX rate and interest rates of both currencies |

► INTENDED RETAIL INVESTOR

This Product is dedicated exclusively to the Customer who:

- Needs to buy the Transaction Currency for the Settlement Currency at the Settlement Date for the Notional Amount equivalent, denominated in the Settlement Currency.
- Has the financial capacity to purchase the Product and incur potential losses resulting from a scenario of market situation development other than expected.
- Needs, until the Settlement Date, hedging against potential appreciation of the Transaction Currency against the Settlement Currency in order to buy the Transaction Currency for the Settlement Currency.
- Has know-how allowing him/her to understand the functioning of the Product and assess benefits and risks accompanying the Product.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

► RISK INDICATOR

The risk indicator assumes you keep the Product until the Settlement Date. The actual risk can vary significantly if you end your Product early and you may get back less. You may not be able to end your Product early. You may have to pay significant extra costs to terminate the Product earlier.

The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you. We have classified this Product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance at a very high level, and poor market conditions are very likely to impact our capacity to pay you.

- **Be aware of the FX risk. You will be receiving payments in another currency, therefore the final return you obtain depends on the FX rate of two currencies. This risk is not included in the ratio presented above.**
- The Product does not include any protection from future market performance, so you could incur significant losses.
- In some circumstances, you may be required to make payments to pay for losses. **The total loss you may incur may be significant.**
- Until the Settlement Date, the market value Product (Mark-to-Market or MtM) is variable and may turn out to be negative. MtM of the Product depends, among others, on MtM Dependency Factors and on Product features. Additional risks related to the Product functioning are listed in the section "What is this Product?"
- If the Underlying Need changes, then this Product may be amended upon your request, under certain conditions.
- If we are not able to pay you what is owed, you could incur significant losses.

► PERFORMANCE SCENARIOS

- What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.
- The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

| | | |
|------------------------------------|---|---------------|
| Recommended holding period: | 1 year | |
| Example investment: | 10 000 EUR | |
| Scenarios | If you end the Product after 1 year | |
| Minimum | There is no minimum guaranteed return if you exit before 1 year. You could lose some or all of your investment | |
| Stress | What you might get back after costs | -5 570,00 EUR |
| | Average return each year | - 55,70% |
| Unfavourable | What you might get back after costs | -1 640,00 EUR |
| | Average return each year | - 16,40% |
| Moderate | What you might get back after costs | - 730,00 EUR |
| | Average return each year | - 7,30% |
| Favourable | What you might get back after costs | 120,00 EUR |
| | Average return each year | 1,20% |

- The potential return is calculated as a percentage over the notional amount. The formula for the calculation shall be the following: Net profit or loss/Notional Amount
- The figures shown include all costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.
- The stress scenario shows what you might get back in extreme market circumstances.
- The Product cannot be easily ended. If you end the Product earlier than the recommended holding period you may have to pay extra costs.
- Buying this product holds that you think the underlying price will increase.
- Your maximum loss would be that you will lose all your investment.
- This table shows the money you could get back or pay in the period between the Transaction Date and the Settlement Date under different scenarios, provided that the nominal amount (Notional Amount) equals 10,000 EUR.

WHAT HAPPENS IF BANK IS UNABLE TO PAY OUT?

In the case when we lose the ability to perform our obligations, legal provisions concerning restructuring and ordered liquidation with respect to credit institutions and investment firms shall apply. Due to our default, you may incur a loss. The Product is not subject to the protection by the Bank Guarantee Fund or any other investor-compensation scheme or guarantee to investors.

WHAT ARE THE COSTS?

► COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the holding period you would get back the amount that you invested (0 % annual return).
- 10 000 EUR is invested.

| If you end the Product after 1 year | |
|-------------------------------------|------------|
| Total costs | 350,00 EUR |
| Annual cost impact * | 3,50% |

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be - 3,80 % before costs and - 7,30 % after costs.

► COMPOSITION OF COSTS

| One-off costs upon entry or exit | | If you end the Product after 1 year |
|--|---|-------------------------------------|
| Entry costs | These costs are already included in the price you pay | 350,00 EUR |
| Exit costs | Exit costs are incurred in the event of early termination of the Product. They are calculated on the same basis as entry costs - i.e. using the maximum margin. | 350,00 EUR |
| Ongoing costs [taken each year] | | |
| Management fees and other administrative or operating costs | 0,0 % of the value of your investment per year [†] . This is an estimate based on actual costs over the last year. | 0 EUR |
| Transaction costs | 0,0 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | 0 EUR |
| Incidental costs taken under specific conditions | | |
| Performance fees and carried interest | There is no performance fee for this Product. | 0 EUR |

† This illustrates costs in relation to the notional value of the PRIIP.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

RECOMMENDED HOLDING PERIOD: 1 YEAR

As it is necessary to protect against Risk to be hedged between the Transaction Conclusion Date and the Settlement Date, the Product should be maintained until the Settlement Date. Termination of the Product prior to the Settlement Date is only possible in the event of circumstances specified in the Master Agreement concluded with us or by mutual agreement. Termination of the Product before the Settlement Date may incur additional costs.

HOW CAN I COMPLAIN?

All complaints about the Product, Product manufacturer or the person selling the Product may be filed:

- electronically - via electronic banking systems or using a complaint form at the Bank's website: www.bnpparibas.pl
- by phone on: +48 500 990 500 – for domestic calls, +48 22 134 00 00 – for domestic and foreign calls (the operator's rates apply)
